

2012
RESIDENTIAL PLAY STRUCTURE PRICES

Effective 1 January, 2012

1. AGE-APPROPRIATE PLAY STRUCTURES

Phunzone residential play systems are primarily designed for the 5 and under age group. The designs meet the safety requirements for ATSM F-1148 “Home Playground Equipment”

Over time, older children (6 and over) have the option to “disassemble” the structure and create totally new designs. This is a major benefit to a “modular” system.

Play Weight Limit: Recommended safe play limit on panels - 110 lbs. However, it’s not a problem for larger adults to get on to clean or maintain. Best for adults to place weight on tubes between panels.

NOTE: We **do not** have designs for the older “**School-Age**”group (6-12 years)

2. COMMERCIAL PLAYGROUNDS

These are made from exactly the same components as the residential structures, but have more stringent “commercial” construction standards than “home” playgrounds.

3. CONSTRUCTION KITS

These are smaller pre-packed residential construction kits and accessories like pools, vehicles and slides. Includes “Combo Kits”. Use same components as all the “playgrounds”.

4. BALLPITS

We do not offer structures where the slide is attached to the ballpit. Some residential models have an optional interior ballpit - balls are not included. We do not sell balls or ball cleaning machines but we provide you with a list of suppliers. Separate, stand-alone ballpits are also available. To reduce damage to bottom panels of ballpit, customers may wish to add some type of foam padding.
