## FLOATING SHAPES

#600303 (Single)  
LWH: 2.8' x 2.8' x 2.8'

#600305 (Single)  
LWH: 2.8' x 2.8' x 2.8'

#600304 (Double)  
LWH: 5.4' x 2.8' x 2.8'

Even when filled with water,  
the hollow plastic tubes will float

Neutral buoyancy can be achieved  
by placing weights inside the tubes.

Weights can be made simply by  
filling 1" PVC tubing with sand and  
capping both ends

You can also use other weight  
products as long as they will not rust  
or react chemically with the water.

#600306 (Double)  
LWH: 5.4' x 2.8' x 2.8'

#600302

You can create your own shapes  
and designs based on the  
number and size of components
