

According to ASTM-F1487 the flat surface of a window ledge is considered a play area onto which a child can and will climb and from which he/she could possibly jump or fall. Any resulting injury could leave the owner of the facility fully liable.

To eliminate this problem, the Window-WedgeJ is a lightweight, easy to install solution for virtually all types or size of ledges or sills including a wide range of mullions. (Indoor or Outdoor)

A minimum investment for maximum safety.
