

# POOL DOCKS

## OPERATING RULES

***Ensure that all staff have read and understand these rules***

1. **CHECK** regularly that all panels are secured with 4 black panel screws.
  - If not properly secured, the panels can bend and/or collapse along the edges
2. **CHECK** regularly that all tubes are secured with colored screws.
  - Do not leave any tube hole open - especially in tubes that have aluminum reinforcements
3. **NEVER** lift, lower, carry, pull or move any platform by the **RAILING** or **SUPERSTRUCTURE**
  - The structures are not welded. NEVER stress the railings or superstructures.
4. **ALWAYS** “push” platform out of the pool. **NEVER** “pull” platforms out of the pool
  - Pulling or dragging platforms will stress the systems, especially with larger structures
5. **NEVER** drag the platform on the ground
  - Dragging will wear out the bottoms of the tubes and connectors.
6. **ENSURE** that the platform has adequate ballast to make it sink to the bottom of the pool
7. **PLACE** platform at least 6 ft away from edge of pool so kids cannot jump on/off
8. **DEPTH** of water must be appropriate to the height of the platform
9. **NEVER** use the platforms for purposes for which they were not intended
10. **NEVER** leave platforms unattended (in water or on the side of pool area)
11. **NEVER** exceed the recommended number of children using the platforms
12. **NO DIVING** or jumping from platforms
13. **NO SWIMMING** under or through platforms
14. **CLEAN** platforms periodically to ensure no mildew or other bacterial build-up
